# SPECIALIST OUTPATIENT SERVICES

Referrals to either Nambour, Gympie or Caloundra  
Specialist Outpatients Departments  
should be addressed to:

**Nambour General Hospital & Caloundra Health Service**  
Specialist Outpatients Department  
Central Referral Centre  
PO Box 547  
NAMBOUR QLD 4560

or

**Gympie Health Service**  
Specialist Outpatients Department  
Locked Mail Bag No 15  
GYMPIE QLD 4570

Appointments at all clinics will be allocated on classification\*\* of the referral by the relevant consultant.

## Referrals to any specialist clinics must be in writing and contain the following minimum information:

- Up to date patient identifying information i.e. full family name and given names, date of birth and contact details including telephone numbers (the UR number, if known, will ensure correct identification)
- Referring practitioner contact details, date of referral and signature of referring practitioner
- Relevant information about the patient's condition and the need for specialist services
- Investigations and treatment undertaken
- Past medical and surgical history
- Current medications
- Patient status
- Relevant psycho-social issues.

Referrals for specialist outpatient services remain valid for a single course of treatment or for a period of twelve months from the initial specialist outpatient consultation, whichever is the lesser. On the occasion of referral for a chronic or long-term condition that will extend beyond twelve months (eg renal and oncology), the referral must indicate that it is valid for an indefinite period.

\*\* Routine clinical appointments are classified according to the Queensland Health Policy Framework for Specialist Outpatient Services based on the information you supply on referral. See [http://www.health.qld.gov.au/surgical\\_access/doc/27181.pdf](http://www.health.qld.gov.au/surgical_access/doc/27181.pdf) for further information

A confirmation letter is sent to the patient and the referring Doctor stating the District's receipt of the referral.

- Category 1** Appointment desirable within 30 days for a condition that has the potential to require more complex care or have significant impact on quality of life if delayed.
- Category 2** Appointment desirable within 90 days for a condition that is unlikely to deteriorate quickly or require more complex care if delayed.
- Category 3** Appointment not required within 90 days for a condition that will not deteriorate quickly or require increased complex care if delayed.
